

S5 Table. Dengue infection rates. The efficiency rates of infection (mosquitoes with dengue positive bodies), dissemination (infected mosquitoes with dengue positive heads) and infectiousness (infected mosquitoes with dengue positive saliva) across season and land class. Raw numbers of positive samples are shown with percentages in parentheses.

Season	Land Class	No. tested	No. infected (%)	No. disseminated (%)	No. infectious (%)
<i>Summer</i>	Rural	56	22 (39)	19 (48)	6 (15)
	Suburban	57	32 (56)	26 (81)	10 (31)
	Urban	51	10 (20)	10 (100)	7 (70)
<i>Fall</i>	Rural	50	32 (64)	30 (94)	3 (9)
	Suburban	43	28 (65)	25 (89)	3 (11)
	Urban	51	10 (20)	10 (100)	7 (70)
